

MOHAMMAD SAUD

Digital Content and Communications Officer @ CeRDI | Digital Health Innovator | Aspiring Project Manager & Business Analyst

Ballarat, Victoria, Australia · msaud1959@gmail.com · linkedin.com/in/mohammadsaud · github.com/msaud1959

PROFILE

IT student at Federation University Australia working at the intersection of software, data and people. Professional experience in research-data publishing, GIS/spatial data, web content, QA and stakeholder communication at CeRDI; founder of KidneyMate, a chronic kidney disease self-management app developed through the FORGE Pre-Accelerator. Aiming for project management and business analysis roles in agile teams.

EXPERIENCE

Digital Content and Communications Officer — CeRDI, Federation University 2024 – Present

- Contributed to **Visualising Australasia's Soils (VAS)**: preparing, checking and publishing soil and land research data for a public knowledge portal.
- Digitised and restructured the **Victorian Resources Online (VRO)** archive — decades of legacy scientific content made searchable and reusable.
- Handled **GIS and spatial datasets** (QGIS) behind interactive map portals.
- Managed web content and digital assets; performed **software testing/QA** and wrote internal documentation.
- Liaised with researchers and project stakeholders to verify and ship content accurately.

Founder — KidneyMate (FORGE Pre-Accelerator) 2025

- Designed and built a cross-platform CKD self-management app (Flutter, Supabase, PostgreSQL): diet and fluid tracking, symptom logging, medication reminders and patient education.
- Validated the problem through research and customer discovery; pitched the venture to mentors and judges.

PROJECTS

- KidneyMate** — CKD self-management app; founder, product and development. Flutter · Supabase · SQL.
- Visualising Australasia's Soils** — research-data portal work at CeRDI. QGIS · metadata · QA · documentation.
- RetailSenseAI** — retail decision-support system (university team project): requirements, data modelling, analytics dashboards and final business-case presentation. Python · SQL.

EDUCATION

Bachelor of Information Technology — Federation University Australia 2023 – Present

- Focus areas: software development, databases and SQL, data analytics, IT project management.

SKILLS

Development	Flutter · Dart · Supabase · PostgreSQL · SQL & database design · Python · HTML/CSS/JS · Git
Data & GIS	QGIS · spatial data management · data analytics · dashboards & visualisation · Excel
Digital & quality	Web content & digital asset management · testing/QA · documentation · research & reporting
Professional	Leadership · stakeholder & client engagement · teamwork & agile · problem-solving · pitching

HIGHLIGHTS

- Selected for the **FORGE Pre-Accelerator** (health-tech venture program), Ballarat.
- Pitched KidneyMate to mentors, judges and a live audience.
- Professional research-centre role held concurrently with full-time study.
